Espresso dial-in log

Grinder: _____ Machine: _____ Basket: _____ g

Weigh dose and yield. Time the shot from pump start. Change one thing per shot, then write down what happened.

Date	Coffee	Dose (g in)	Yield (g out)	Time (s)	Ratio 1 : ?	Grind setting	Taste notes	Next change
					1 :

If it tastes… (adjust one thing at a time, then pull another shot)

Sour

Sharp, tart, thin or salty, with a short finish.

Grind finer so the shot runs slower, or let the yield run longer (for example 1:2 to 1:2.3).

Bitter

Dry, ashy or lingering, with a long slow shot.

Grind coarser so it runs faster, or stop the shot sooner (for example 1:2 to 1:1.8).

Thin

Watery, weak, little body or sweetness.

Stop at a shorter yield, nudge the dose up (within your basket's range), or grind a little finer.

Harsh

Rough, sharp or drying edge; may taste uneven.

Spread and tamp the grounds level to avoid channels, go a touch coarser, and try fresher beans.
